January 30, 1961

DEMAND DEPOSITS, CURRENCY, AND RELATED ITEMS  
(Averages of daily figures)

Money supply (defined as demand deposits adjusted and currency outside banks), declined \$0.3 billion in December, after allowance for the usual seasonal change. Time deposits at member banks continued to increase rapidly.

p - Preliminary.

NOTES: The demand deposit component consists of demand deposits other than domestic commercial interbank and U. S. Government, less cash items reported as in process of collection and Federal Reserve float. Cash items reported as in the process of collection by member banks are deducted from the demand deposits of member banks and nonmember commercial bank demand deposits follow a parallel logic. Since Federal Reserve float is not divisible on the basis of member-nonmember attribution, it is deducted in whole from the member bank demand deposit component (column 1). The currency component consists of currency outside the Treasury, the Federal Reserve, and the vaults of all commercial banks.
