r -- Revised.

2/ For description and weekly indexes for the period January 1937 to March 1958 see Federal Reserve <u>Bulletin</u> for April 1958, pp. 412-421.

Weekly indexes at the district and city levels are published by several of the Federal Reserve Banks.

^{1/} During March and April changes from a year ago reflect in part the fact that last year Easter was on April 17 while this year it was on April 2. For this reason it is estimated that in comparison with last year an allowance should be made for an increase in sales of about 8 per cent for the month of March as a whole and a corresponding decrease for the month of April. These allowances apply to the figures for the United States.
