| Total | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

## 1/ Figures are predominatly for late model used cars but include data from a few banks for all used cars.

NOTE: Distributions are based on tabulations of data from 119 banks for September and August and are not intended to be estimates for all commercial banks. In September, reports covered about 40,000 contracts on nev cars, 29,000 purchased and 11,000 direct, and 28,000 contracts on used cars, 19,000 purchased and 9,000 direct. Data are not comparable with previous releases since composition of the group of banks changes from month to month.

For distribution according to maturi\&ies and contract balances as a percentage of dealer cost see following pages.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TO: Systen users of monthly L.4. 2 release
on terms of auto credit
FROM: Harlou D. Osborne

RE: Proposed changes in L. 4.2 release

For some time ve have been woriking on ways to improve the substance and presentation of the data presently distributed through our L. 4.2 release.

This month ve are enclosing vith the regular release a set of nev suamary tables on which ve should like your comments and suggestions.

These summary tables have a longer time span than does the present release and we are considering their adoption to replace page 1 of the present release.

In addition to these proposed changes in the form of presentation, work is being pushed along on the problems inherent in the small sample and its changing composition from month to month, and in the incorporation of sales finance company figures; and we are experimenting with seasonal adjustment of the data.

We should be glad to have your thoughts on the proposed new form of the release and also on these substantive matters.
