

FEB 25 1971

BANKING AND MONETARY DEVELOPMENTS IN JANUARY 1971

Summary. Commercial bank credit, adjusted for transfers of loans between banks and their affiliates, increased substantially in January--at a pace more than double that of the fourth quarter. Acquisitions of State and local securities continued very heavy and holdings of U.S. Treasury issues increased moderately further. Total loans rose somewhat more than in other recent months reflecting expansion in most major categories.

The money stock grew less rapidly in January than in the fourth quarter. But U.S. Government deposits increased further. And expansion in time and savings deposits continued large. Reductions in bank-related commercial paper moderated but reductions in Euro-dollar borrowings remained substantial. Net borrowed reserves of member banks increased somewhat.

Bank credit. Total loans and investments at all commercial banks, after adjustment for loan transfers, increased \$5.4 billion in January compared with an average monthly increase of \$2.1 billion over the fourth quarter. Loan growth picked up somewhat and acquisitions of investments, concentrated in State and local issues, continued very heavy. At large banks, total credit adjusted for loan sales, declined less than in the comparable January weeks of 1970 and 1969 reflecting principally a contra-seasonal increase in investment holdings. At small banks, total credit increased slightly whereas it usually declines; investment holdings rose substantially and loan repayments were somewhat smaller than usual.

Holdings of securities, other than U.S. Treasury issues, increased \$2.8 billion in January compared with an average monthly increase of \$2.3 billion over the fourth quarter. The bulk of the increase was in State and local securities with intermediate and longer-term maturity dates. But holdings of short-term municipals declined less than usual and holdings of Federal agency securities rose contraseasonally.

Holdings of U.S. Treasury issues increased \$400 million further in January--much less than in December which included a Treasury financing but more than the average increase for the fourth quarter. At large banks, a substantial part of the increase was in notes and bonds with less than one year to maturity. This probably reflected bank acquisitions of rights to be exchanged in the Treasury's mid-February refinancing. Holdings of longer-term issues declined.

Total loans, adjusted for transfers, increased \$2.2 billion in January--considerably more than in other recent months. Business borrowing rose following a four month reduction. Security loans increased further as a sharp month-end expansion, presumably associated in part with borrowing for rights purchases, more than offset reductions early in the month. Loans to nonbank financial institutions also increased following only small growth in late 1970. Moderate expansion continued in real estate and consumer loans.

Business loans, adjusted for transfers, increased \$500 million in January following an average monthly reduction of about \$900 million over the previous four months. In part, however, the January increase may have reflected technical window dressing adjustments affecting both December and January and if the two months were taken together, business loans about levelled off compared with the sharp declines of the previous three months. The recent stronger business loan picture may have been associated in part with the post auto-strike recovery in business activity. In addition, loan repayments out of the proceeds of capital market financing may have fallen off in January. At weekly reporting banks, borrowing by public utilities accounted for a large part of the January increase but loans to firms in several other industries--commodity dealers, retail trade, chemicals, and construction--appeared fairly strong.

Money stock, time deposits, and nondeposit sources of funds. The money stock increased at an annual rate of 1.7 per cent in January compared with 3.4 per cent over the fourth quarter. Currency holdings of the public continued to show strong growth but private demand deposits levelled off. U.S. Government deposits increased further.

Growth in time and savings deposits at all commercial banks was at an annual rate of 25.5 per cent in January, somewhat less rapid than in December but faster than in the fourth quarter. At large commercial banks, inflows of consumer type time and savings deposits were heavy and acquisitions of large negotiable CD's continued relatively substantial. Expansion in State and local deposits was also large. In addition, at country banks, growth in total time and savings deposits continued strong.

Nondeposit sources of funds declined \$1.5 billion in January-- little different from the reduction in each of the three previous months. However, the recent decline was concentrated in Euro-dollar borrowings-- whereas the reduction of the early fall reflected principally run-offs of bank-related commercial paper.

Bank reserves. Net borrowed reserves of member banks averaged about \$125 million over the four weeks ending January 27 compared with \$85 million in December. Member bank borrowings increased somewhat and excess reserves declined.

<sup>1/</sup> Adjusted to exclude interbank loans.      p - Preliminary      e - Estimated

<sup>2/</sup> Estimated as of December 31.

<sup>3/</sup> Beginning June 9, 1966, loan data exclude \$1.1 billion of balances accumulated for payment of personal loans. Beginning June 30, 1966 total loans exclude, and other securities include, about \$1 billion of participation certificates.

<sup>4/</sup> Beginning July 1969, bank credit data are revised to include all bank premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data for commercial banks only. Also total loans and investments are now reported gross of valuation reserves rather than net as previously reported. Individual loan items have always been reported gross.

NOTE: Chart has not been completely revised for changes in data relating to benchmark revisions. Overlapping data for March 1969 and October 1969 are shown.

<sup>1/</sup> Data are comparable with previous months. Individual loan items are gross throughout and the effect of consolidation in June 1969 on any one loan item was nominal.

<sup>2/</sup> Real estate loans decreased by \$500 million on December 31, 1969, and loans to nonbank financial institutions increased by \$500 million due to change in method of reporting mortgage loans held under repurchase agreements.

<sup>3/</sup> Consumer credit data adjusted in July to exclude about \$400 million of consumer paper sold by finance companies to the banking system but classified as loans to nonbank financial institutions on bank records. Subsequent repayments are also included in loans to nonbank financial institutions.

NOTE: Chart has not been completely revised for changes in data relating to benchmark revisions. Overlapping data for March 1969 and October 1969 are shown.

These data are not for publication.

1/ Less than \$50 million.

\*-See footnote 3, Exhibit B, Part II

NOTE: The above table, which extends Exhibit A, Part III, provides information on the outstanding volume of loans sold outright by major loan categories and the total volume of loans outstanding, adjusted to include loans sold in each category. Users of these data should be aware of their potentially imprecise nature due to several problems inherent in reporting and tabulation procedures. A small problem of coverage exists because the loan figures are those reported at all commercial banks while loan sale figures are those collected only from weekly reporting banks. A larger problem exists in regard to accounting for revisions in the data on loans sold. A revision in loans sold which is not supplemented by revisions reported in a specific category cannot be classified and therefore must be included in the figure "all other". This series begins in June 1969.

e - Estimated.

r - Revised.

p - Preliminary.

<sup>1/</sup> Less than \$50 million.

<sup>2/</sup> Adjusted to exclude interbank loans.

<sup>3/</sup> Based on consumer credit data adjusted in July to exclude about \$400 million of consumer paper sold by finance companies to the banking system but classified as loans to nonbank financial institutions on bank records. Repayments in subsequent months are also included in loans to nonbank financial institutions.

Individual Loan Categories Are Not Available for Publication.

NOTE: Data exclude all interbank loans; Call report data for large commercial banks used when available.

1/ Less than \$50 million.

2/ Based on estimated data for December 31, 1970 and December 31, 1963.

3/ Allowance has been made in monthly changes in total loans and in other securities for approximately \$1 billion of participation certificates shifted from loans to other securities in late June 1966: \$700 million at large banks and \$300 million at other banks.

4/ Allowance has been made in monthly changes in total credit and in total loans for the \$1.1 billion of balances accumulated for the payment of personal loans excluded from time deposits and from loans on June 9, 1966: \$400 million at large banks and \$700 million at other banks.

5/ Based on revised coverage beginning July 1966; January 1967, 1968, 1969, and 1970.

6/ Based on revised reporting beginning July 1969. Changes have been adjusted to maintain comparability of series.

p - Preliminary. e - Estimated r - Revised  
NOTE: Data exclude interbank loans. Consumer and "other loans" are partly estimated for all dates. Other data are partly estimated on all but June and December call dates.

- 1/ Beginning June 9, 1966, \$1.1 billion of balances accumulated for the payment of personal loans were deducted from time deposits and "all other" loans.
- 2/ Beginning June 30, 1966, about \$1 billion of participation certificates previously included in agricultural and "all other" loans were reclassified as "other securities."
- 3/ Data revised to include all bank premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data are for commercial banks only. Also, total loans and investments are now reported gross of valuation reserves rather than net as previously. Individual loan items have always been gross.
- 4/ Real estate loans decreased by \$500 million on December 31, 1969, and loans to nonbank financial institutions increased by \$500 million due to change in method of reporting mortgage loans held under repurchase agreements.
- 5/ Consumer credit data adjusted in July to exclude about \$400 million of consumer paper sold by finance companies to the banking system but classified as loans to nonbank financial institutions on bank records. Subsequent repayments are also included in loans to nonbank financial institutions.

Individual loans category data are available for publication only on a June and December Call data basis

1/ Total loans (adjusted to exclude loans to banks); U.S. Government securities maturing within one year estimated on basis of Treasury survey of ownership; and total deposits (adjusted to exclude cash items in process of collection).

2/ Beginning June 1969, total loans are reported gross of valuation reserves rather than net as previously reported. The higher loan level increased the ratio by about 1.3 percentage points for all commercial banks.

\* - Ratios in parenthesis are those obtained by adding Euro-dollars to the deposit base.

### DEPOSITS AND CURRENCY AND TURNOVER OF DEMAND DEPOSITS

Seasonally adjusted. Deposits, average of daily figures. Turnover, monthly.

<sup>1/</sup> Averages of daily figures.

<sup>2/</sup> Beginning on June 9, 1966, time deposit data exclude \$1.1 billion of balances accumulated for the payment of personal loans.

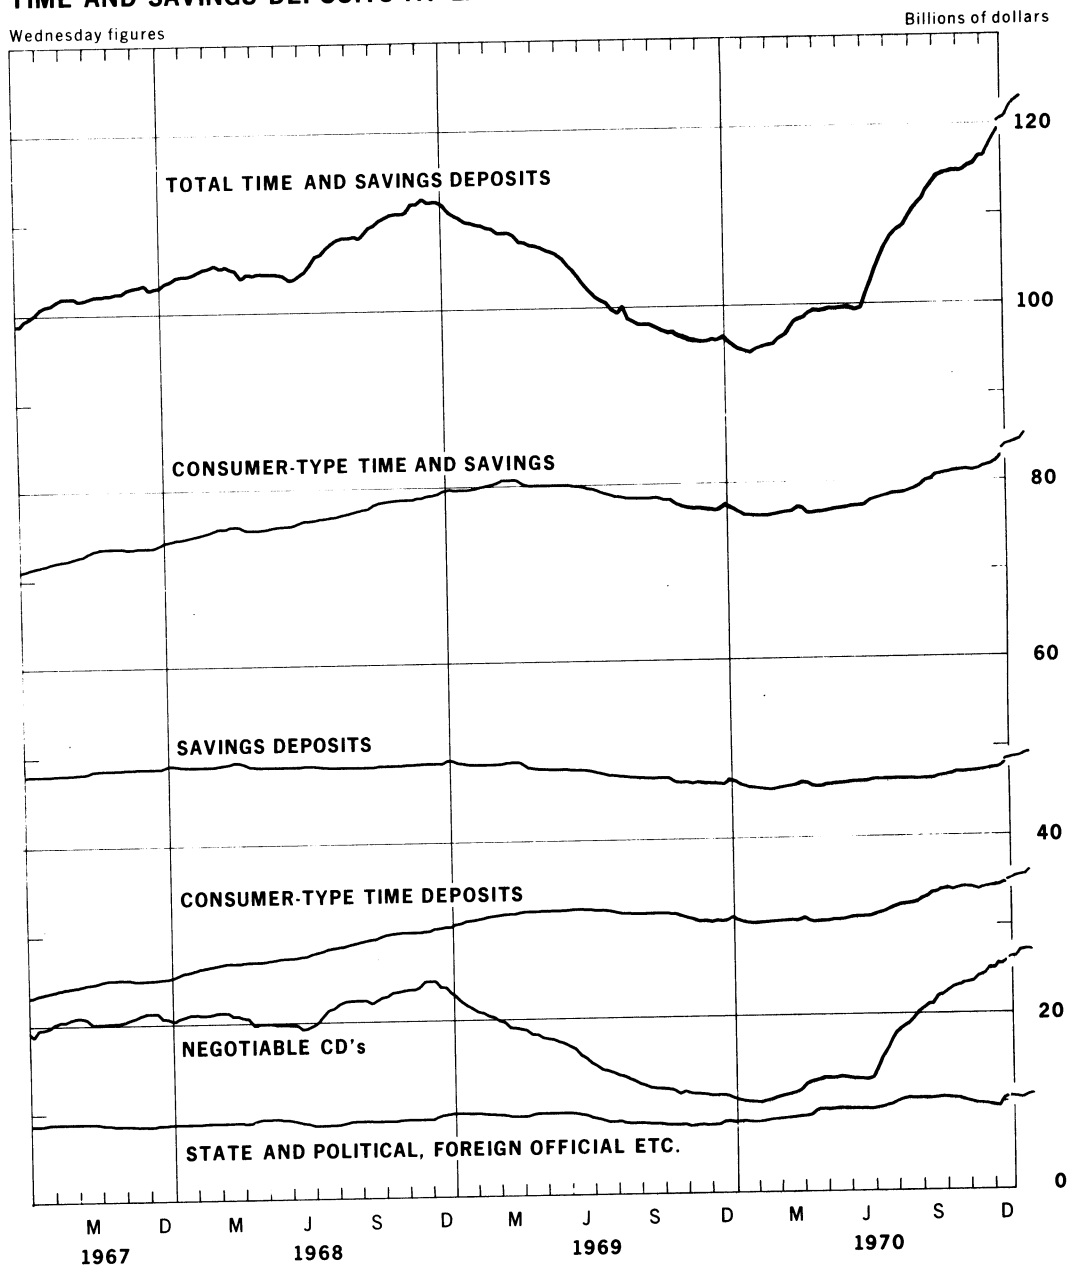

<sup>3/</sup> Last Wednesday of month.

<sup>4/</sup> Certain changes in coverage and definitions have occurred that affect somewhat the comparability of the data. Breaks in the series are relatively small however.

Beginning January 1964, data for 232 metropolitan centers outside New York City.

p - Preliminary.

For footnotes see next page.

r - Revised.

p - Preliminary.

\* - Beginning with data for June 1966, total liquid assets and time deposits at commercial banks exclude \$1.1 billion of balances accumulated for the payment of personal loans.

§ - Figures are for Tuesday, December 31, rather than for the last Wednesday of December.

NOTE: Total liquid assets and U.S. Government securities maturing within 1 year revised beginning January 1969 to conform to new Budget concept. Both figures were increased by \$1.7 billion on that date.

Exhibit K (Continued)

1. Excludes holdings of the United States Government, Government agencies and trust funds, domestic commercial banks, and Federal Reserve Banks. Adjusted to avoid double counting whenever possible. All series adjusted for seasonal variation by the X-9 variant of Method II developed by the Bureau of the Census.
2. Data are for demand deposits adjusted and currency outside banks and are as of the last Wednesday of the month. In concept the figures agree with the daily average money supply described in detail in the Federal Reserve Bulletin for August 1962, p. 941, except that demand deposits held by mutual savings banks and by savings and loan associations have been deducted to avoid double counting. Demand deposits of commercial banks in Alaska and Hawaii are included beginning January 1959 and August 1959, respectively, except that one national bank in Alaska and one national bank in Hawaii were included in April 1954 and April 1959, respectively. Demand deposits due to banks in United States possessions are included throughout. Data have not been revised to conform with the daily average money supply revision (beginning June 1967) associated with Euro-dollar transactions.
3. Total time deposits at commercial banks except interbank, U.S. Treasurer's open account, and postal savings redeposited in commercial banks. Data are as of the last Wednesday of month except June 30 and December 31 when call data for these dates were used when available. Time deposits of commercial banks in Alaska and Hawaii and time deposits due to banks in U. S. possessions are included as indicated for demand deposits in footnote 2 above.
4. Figures compiled by the Federal Savings and Loan Insurance Corporation except that prior to 1955 data are Board estimates based on monthly figures of inflow of new savings and withdrawal of savings capital compiled by the Federal Home Loan Bank Board.
5. Includes all types of savings bonds held by investors other than commercial and mutual savings banks and U.S. Government agencies and trust funds. Holdings of savings and loan associations are also excluded beginning in February 1960, the earliest date for which separate figures for these institutions are available. Figures are from data compiled by the U. S. Treasury Department.
6. Beginning December 1950 figures include Treasury marketable securities and Federal agency securities maturing within one year, except holdings of domestic commercial, mutual savings, and Federal Reserve Banks, Government agencies and trust funds, and beginning February 1960, savings and loan associations. Figures have been adjusted to include partially tax-exempt securities 12 months prior to first call date, and prior to 1956, nonmarketable Treasury savings notes with maturities up to 36 months. Prior to December 1950 figures for marketable issues include securities callable within one year. Figures represent par value and are from the U. S. Treasury Department's Survey of Ownership of U. S. Government Securities.
7. Gross national product figures are available quarterly and annually only. Data for total liquid assets used in computing these ratios are quarterly averages calculated for four dates (each month of the current quarter and the last month of the preceding quarter).
