## APPENDIX

### Revision in Commercial Bank Credit Series

The seasonally adjusted series for commercial bank credit and its major components have been revised to take account of changes in seasonal factors and of adjustments to benchmarks for the latest available Call date, June 30, 1973.

Revisions in seasonal factors affect the seasonally adjusted data from 1959 to date with the principal changes reflected in data beginning in 1968.

The benchmark revisions based on the June 30, 1973, Call affect data not seasonally adjusted from January through September 1973. However data prior to January 1973 may vary slightly from those previously published because of rounding differences associated with the current computer operations.

APPENDIX

continued

Notes on data

Data are for last Wednesday of month except for June 30 and and December 31; data are partly or wholly estimated except when June 30 and December 31 are Call dates.

Total loans and total loans and investments are adjusted to exclude commercial interbank loans.

Loans sold are those sold outright by commercial banks to own subsidiaries, foreign branches, holding companies, and other affiliates.

The seasonally adjusted series for "U.S. Treasury securities" is a residual derived by subtracting "Loans" and "Other securities" from "Total loans and investments."

Beginning June 30, 1969, data revised to include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data include commercial banks only. Also, loans and investments are now reported gross, without valuation reserves deducted, rather than net of valuation reserves as was done previously. Data shown in following tables have been revised to include valuation reserves.

Beginning June 9, 1966, about \$1.1 billion of balances accumulated for payment of personal loans were deducted from total loans as a result of a change in Federal Reserve regulations.

Beginning June 30, 1966, CCC certificates of interest and Export-Import Bank portfolio fund participation certificates totalling an estimated \$1 billion are included in "other securities" rather than in "loans."

Beginning June 30, 1971, Farmers Home Administration insured notes totalling approximately \$700 million are included in "other securities" rather than in "loans."

Beginning June 30, 1972, commercial and industrial loans were reduced by about \$400 million as a result of loan reclassifications at one large bank.

\* Commercial bank credit series revised to incorporate new seasonal adjustment factors and the benchmark revision for the June 30, 1973 call date information for nonmember banks.

- 1/ Data are comparable with previous months. Individual loan items are gross throughout and the effect of consolidation in June 1969 on any one loan item was nominal.
  - 2/ Real estate loans decreased by \$500 million on December 31, 1969, and loans to nonbank financial institutions increased by \$500 million due to change in method of reporting mortgage loans held under repurchase agreements.
  - 3/ Consumer credit data adjusted in July to exclude about \$500 million of consumer paper sold by finance companies to the banking system but classified as loans to nonbank financial institutions on bank records. Subsequent repayments completed in February 1972 are also included in loans to nonbank financial institutions.
  - 4/ Beginning June 1972, business loans were reduced by \$400 million, nonbank financial increased by \$300 million, and "other" loans increased by \$100 million as the result of loan reclassification at one large bank.
- p - Preliminary.

NOTE: Data exclude all interbank loans; call report data for large banks used when available. Loans adjusted to include all loans sold to bank holding companies, affiliates, subsidiaries, or foreign branches.

- 1/ Less than \$50 million.
- 2/ Based on revised reporting beginning July 1969. Changes have been adjusted to maintain comparability of series.
- 3/ Based on revised coverage beginning July 1966, and January 1967, 1968, 1969, 1970, 1971, and 1972.
- 4/ Allowance has been made in monthly changes in total loans and in other securities for approximately \$700 million of Farmers Home Administration insured notes shifted from loans to other securities on June 30, 1971; \$200 million were at weekly reporting banks and \$500 million at other banks.
- 5/ Allowance has been made in monthly changes in total loans and in other securities for approximately \$1 billion of participation certificates shifted from loans to other securities at the end of June; \$700 million were at weekly reporting and \$300 million at nonweekly reporting. Allowance has been made in monthly changes in total credit and in total loans for the \$1.1 billion of balances accumulated for the payment of personal loans excluded from time deposits and from loans on June 9; \$400 million were at weekly reporting banks and \$700 million at other banks.
- 6/ Series revised to incorporate the benchmark revision for the June 30, 1973 call date information for nonmember banks.

p - Preliminary

NOTE: Data exclude domestic interbank loans. Consumer and "other loans" were partly estimated for all dates. Other data are partly estimated on all but June and December call dates.

<sup>1/</sup> Beginning June 9, 1966, \$1.1 billion of balances accumulated for the payment of personal loans were deducted from time deposits and "all other" loans.

<sup>2/</sup> Beginning June 30, 1966, about \$1 billion of participation certificates previously included in agricultural and "all other" loans were reclassified as "other securities".

<sup>3/</sup> Data revised beginning June 1969, to include all bank premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data are for commercial banks only.

<sup>4/</sup> Real estate loans decreased by \$500 million on December 31, 1969, and loans to nonbank financial institutions increased by \$500 million due to change in method of reporting mortgage loans held under repurchase agreements.

<sup>5/</sup> Beginning June 1972, business loans were reduced by \$400 million, nonbank financial increased by \$300 million, and "other" loans increased by \$100 million as the result of loan reclassifications at one large bank.

<sup>6/</sup> Series revised to incorporate benchmark revisions for the June 30, 1973 call date information for nonmember banks.

\* - Ratios in parentheses are those obtained by adding Euro-dollars to the deposit base.

- 1/ Total loans (adjusted to exclude loans to banks); U.S. Government securities maturing within one year estimated on basis of Treasury survey of ownership; and total deposits (adjusted to exclude cash items in process of collection).
- 2/ Beginning June 1969, total loans are reported gross of valuation reserves rather than net as previously reported. The higher loan level increased the ratio by about 1.3 percentage points for all commercial banks.
- 3/ Loan data revised to exclude only loans to domestic commercial banks. Previous data had also excluded loans to foreign commercial banks.

NOTE: Aggregate reserve series has been adjusted to eliminate changes in percentage reserve requirements against deposits, but reserve requirements on Euro-dollar borrowings are included beginning October 16, 1969, and requirements on bank-related commercial paper are included beginning October 1, 1970.

1/ Beginning with week ending November 15, 1972 total member bank data includes \$450 million of reserve deficiencies on which F.R. Banks are allowed to waive penalties for a transition period in connection with bank adaptation to Regulation J as amended effective November 9, 1972. Beginning 1973, allowable deficiencies included are (beginning with first statement week of quarter): Q1, \$279 million. Class of bank data are not adjusted.

TABLE 14-C  
Liquid Asset Holdings

<u>Column</u>	
1	Sum of columns 2 and 7.
2	Sum of columns 3, 4, 5, and 6.
3, 4, 5	Money stock components after deducting foreign holdings and holdings by domestic financial institutions. The three columns add to $M_2$ held by domestic nonfinancial sectors.
6	Deposits at nonbank thrift institutions, as published in money stock statistics, plus monthly-average deposits at credit unions.
7	Sum of columns 8, 9, 10, and 11.
8	Negotiable certificates of deposits over \$100,000 at weekly reporting banks, except foreign holdings.
9	Commercial paper held outside banks and other financial institutions.
10	Short-term marketable U.S. Government securities excluding official, foreign, and financial institution holdings. All issues due in one year or less, including bonds and notes, plus a sliding proportion of issues due in 13 to 24 months.
11	Series E and H savings bonds held by individuals.
12	Sum of columns 3 and 4 to column 1.
14	Column 6 to column 1.
15	Column 1 to GNP. Annual averages are based on 12-month averages of column 1 and annual GNP. Quarterly averages are based on 3-month averages of column 1 and quarterly GNP.
16	Sum of columns 3 and 4 to GNP. Annual averages are based on 12-month average of columns 3 and 4 and annual GNP. Quarterly averages are based on 3-month average of columns 3 and 4 quarterly GNP.

Bank Credit Revision

The seasonally adjusted series on commercial bank credit and its major components have been revised. The revision included the updating of seasonal adjustment factors and the usual benchmark revision that incorporates the latest Call Report data, June 30, 1973, for non-member banks. Major changes were made in seasonal factors beginning in 1968 with minor scattered changes back to 1964. The benchmark revision covered the January-September 1973 period.

All tables in this Report are on the new basis. An appendix is attached showing monthly data before and after seasonal adjustment for the period, 1959 to date.

These data are not to be released for publication until November 13--the publication date of the H.8 release.

NOVEMBER 29, 1973
