1/ Frequency distribution reflects weeks of indebtedness for all country member banks without regard to period of borrowings. Banks included in count reflect structure as of most recent date.

NOTE: Most ratios are computed from underlying figures in thousands.

Details may not add to totals because of rounding. Amounts of less than \$500,000 denoted by 0. (Less than \$50,000 in line 1 denoted by 0.0) Percentages of less than .1% are denoted by 0.0.

Data Production Section, Division of Data Processing.

2/ As of November 9, 1972, the definition of reserve city and country banks was changed (see Federal Reserve Bulletin, July 1972, p. 626). The classifications employed here are the same as prior to the change in definition, so these series are continuous over time.
