

# Monthly Business Statistics

The data here are a continuation of the statistics published in the 1942 Supplement to the SURVEY OF CURRENT BUSINESS. That volume contains monthly data for the years 1938 to 1941, and monthly averages for earlier years back to 1913 insofar as available; it also provides a description of each series and references to sources of monthly figures prior to 1938. Series added or revised since publication of the 1942 Supplement are indicated by an asterisk (\*) and a dagger (†), respectively, the accompanying footnote indicating where historical data and a descriptive note may be found. The terms "unadjusted" and "adjusted" used to designate index numbers refer to adjustment of monthly figures for seasonal variation.

Data subsequent to October for selected series will be found in the Weekly Supplement to the Survey.

Unless otherwise stated, statistics through 1941 and descriptive notes may be found in the 1942 Supplement to the Survey	1946			1947

\* Revised. † Not yet available. § Personal savings is the excess of disposable income over personal consumption expenditures shown as a component of gross national product above.

\* New series. Quarterly data for 1939-46 and annual data beginning 1929 for national income and gross national product and monthly data for 1929-46 for personal income are published in the "National Income Supplement to Survey of Current Business", which is available from the Superintendent of Documents, Washington, D. C., for 25 cents; these series are compiled by the U. S. Department of Commerce. For source and a brief description of the series on plant and equipment expenditures, see note marked "\*" on p. S-2 of the September 1947 Survey; third quarter of 1947 estimates are based on anticipated capital expenditures of business. Revisions for January 1945-May 1946 for farm income are available on request; see note in September 1947 Survey regarding earlier data.
