THE STATISTICS here are a continuation of the data published in Business Statistics, the 1953 Statistical Supplement to the Survey of Current Business. That volume (price $1.50) contains monthly data for the years 1949 to 1952, and monthly averages for earlier years back to 1933 insofar as available; it also provides a description of each series and references to sources of monthly figures prior to 1949. Series added or revised since publication of the 1953 Supplement are indicated by an asterisk (*) and a dagger (!), respectively, the accompanying footnotes indicating where historical data and a descriptive note may be found. The terms “unadjusted” and “adjusted” used to designate index numbers and dollar values refer to adjustment of monthly figures for seasonal variation.

* Revised.
** Revised series. Quarterly estimates of national income and product have been revised back to 1939 (annual data, to 1929); quarterly and monthly estimates of personal income, back to 1929 (monthly revisions prior to May 1933 appear in the 1946 issue of the National Income Supplement). For quarterly data prior to 2d quarter 1963, see pp. 8 and 9 of the May 1964 Survey. 

Includes inventory valuation adjustment. 

Government sales are not deducted. Personal saving is excess of disposable income over personal consumption expenditures shown as a component of gross national product above.
