 a Estimate based on incomplete data.

their long-term upward trend, have been the most important single factor in the rise in wage and salary disbursements during the past year. Since the spring of 1958 payrolls have also reflected an upturn in average weekly hours of work and a recovery in employment.

Employment has moved up more slowly than the other factors affecting the wage-salary total, and as recently as last March was about 2 percent less than in the third quarter of 1957. At a comparable point in the 1954-55 cyclical upswing, it may be noted, employment was about 1 percent above the preceding peak. This difference reflected mainly the lesser advance reported for nonmanufacturing employment this time than last.

For manufacturing as a whole, employment in March of this year was about 5 percent less than in mid-1957; this was about the same relative shortfall as the one found at a comparable stage of the preceding cyclical upswing.

Employment in nonmanufacturing industries is reported about even with the prerecession high; after a year of business recovery from the 1954 recession, it was 3 percent above the previous peak. The current statistics on employment outside of manufacturing are preliminary, however, and revisions in them may affect this comparison somewhat.

(Continued on page 26)

# Monthly BUSINESS STATISTICS

THE STATISTICS here are a continuation of the data published in the 1957 edition of BUSINESS STATISTICS, biennial Statistical Supplement to the SURVEY OF CURRENT BUSINESS. That volume (price \$2) contains monthly (or quarterly) data for the years 1953 through 1956 and monthly averages for all years back to 1929 insofar as available; it also provides a description of each series and references to sources of monthly figures prior to 1953. Series added or significantly revised since publication of the 1957 BUSINESS STATISTICS are indicated by an asterisk (\*) and a dagger (†), respectively; certain revisions for 1956 issued too late for inclusion in the aforementioned volume appear in the monthly SURVEY beginning with the July 1957 issue. Except as otherwise stated, the terms "unadjusted" and "adjusted" refer to adjustment for seasonal variation.

Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated, statistics through 1956 and descriptive notes are shown in the 1957 edition of BUSINESS STATISTICS	1958										1959

† Revised. <sup>1</sup> Italicized total excludes and other footnoted figures include lump-sum retroactive salary payments to Federal employees; disbursements of \$380 million multiplied by 12 (to put on annual rate basis) amounted to \$4.6 billion. † Revised series. Estimates of national income and product and personal income have been revised back to 1946; revisions beginning 1946 appear on pp. 12 ff. of the July 1958 SURVEY. ‡ Includes inventory valuation adjustment. ¶ For data in constant dollars and revised definitions for several components, (also data back to 1950), see pp. 10 ff. of the December 1958 SURVEY. § Government sales are not deducted. § Personal saving is excess of disposable income over personal consumption expenditures shown as a component of gross national product above.
