TABLE LIST

SUMMARY TABLES

SECTOR TABLES

TRANSACTION TABLES

Seasonally Adjusted

Flow of Funds Accounts, First Quarter 1974

These tables present first estimates of first quarter flow of funds data together with revisions for the four quarters of 1973. Earlier data are unchanged from the February 8 tables.

1973 revisions reflect in part the fourth quarter source information listed below that was not yet available in February. The 1973 figures also reflect the December benchmark condition statement for banks, which affects both third- and fourth-quarter estimates, and annual benchmark revisions in corporate business current assets and liabilities that are published by SEC. The SEC revisions extend back to 1970, but in this set of tables only the 1973 net flows are reflected. The revisions for earlier years will be introduced into the tables later this year as part of a routine annual revision of the flow of funds accounts.

A preliminary version of outstanding assets and liabilities at the end of 1973 will be completed soon and will be distributed shortly.

First-quarter figures are based on early indicators and are therefore highly tentative, particularly in the distribution of financial asset holdings among private nonfinancial sectors. The most important information not yet available in these tables are SEC data on net new security issues and current assets and liabilities of corporations. The lack of these data weakens the figures for total credit flows, household investment in securities, and distribution of liquid assets as between households and business. Also missing at the time the accounts were put together were balance of payments statistics, final income-and-product data, end-of-quarter balance sheets for insurance companies, mutual savings banks, pension funds, and investment companies, and the Treasury survey of ownership of Federal securities.

Requests for unadjusted and for historical annual tables or to be put on the mailing list should be addressed to the Flow of Funds and Savings Section, Room 3222, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C., 20551.

SEASONALLY ADJUSTED ANNUAL RATES

Money Supply Relationship

Part	Line	
I	1	Line 1 of page 15.
	2	Daily averages in this table are increments in month averages from last month of preceding quarter to last month of this quarter.
	3	1 - 2.
	4	5 + 6 + 7.
	5	See Part II, line 5.
	6	Part II, line 6 + Part III, line 4.
	7	Part II, line 7 + Part III, line 5. "Seasonal" here means dollar excess of seasonally adjusted flow over unadjusted flow.
II	1	Lines 14 + 18 + 19 of page 15 at quarterly rates.
	5	Differences between money-supply concept of demand deposits derived from last preceding all-bank total (either last Wednesday of quarter or Call Report) and figure for that one day, e.g., March 29, 1972, derived from data going into daily-average statistics. Quarterly increments in this difference.
	6	Difference between figure for period derived from daily-average data and average for last month of quarter. Quarterly increments in this difference.
	7	8 + 9 + 10 - 11.
	8	Difference in adjustment method: seasonal in daily-average series (month average) adjusted as flows less seasonal in published daily-average series.
	9	Seasonal in F/F demand deposit (based on net change from last day of one quarter to last day of next) less seasonal in daily average adjusted as flows.
	10	Adjustment to seasonal needed as part of the balancing of all seasonally adjusted sources and uses of funds in the flow-of-funds matrix.
III	4	No statistical difference between the two series. In unadjusted data, only difference is between one-day figure for end of quarter and three-week average.
	5-9	Correspond to lines 7 through 11 in Part II.
