

FEDERAL RESERVE statistical release

Z.7 (788)

For immediate release
June 3, 1986

FLOW OF FUNDS SUMMARY STATISTICS

Debt of domestic nonfinancial sectors grew at a seasonally adjusted annual rate of 8.7 percent in the first quarter of 1986, less than half the revised fourth quarter rate of 20.2 percent. Growth in both the federal and private domestic nonfinancial components slowed substantially in the first quarter, to 7.5 percent and 9.1 percent respectively. For the year 1985, total domestic nonfinancial debt grew 15.0 percent, slightly more than earlier estimates.

All of the nonfederal sectors reduced their borrowing in the first quarter. The most significant decrease in growth was in the state and local government sector, where debt growth fell to 4.5 percent compared with a record 62.8 percent surge in the fourth quarter of 1985. Household debt also decelerated as the pace of both consumer credit and net mortgage borrowing moderated. Nonfinancial business borrowing slowed, especially in the short-term area; while net issuance of taxable corporate bonds reached new highs, estimated tax-exempt borrowing declined to negligible levels (Table 4). Also contributing to the slowdown in aggregate debt growth was a sharp decline in seasonally-adjusted federal borrowing, after the late-1985 buildup in cash balances.

For the first quarter net borrowing by all domestic nonfinancial sectors was \$602 billion, at a seasonally adjusted annual rate, bringing total outstanding debt to a level of \$7,033 billion (Table 1). Debt of private domestic nonfinancial sectors accounted for \$5,403 billion of this total, and the federal component was \$1,630 billion.

Growth Rates of Major Debt Aggregates ^{1/}

^{1/} Holdings of deposits and credit market claims by households, nonfinancial business and state and local governments.

Explanatory Notes

Growth rates in the summaries above are seasonally adjusted flows from Table 2 divided by seasonally adjusted outstandings from Table 1 on following pages of this release. Seasonally adjusted levels in Table 1 are derived by carrying forward year-end levels by seasonally adjusted flows plus any statistical discontinuities in the data series. Because of these discontinuities, changes in outstandings as printed can give growth rates that differ from those shown above.

The following list gives the lines in Tables 1 and 2 that are used to calculate growth rates shown on page 1 of this release:

	<u>Growth Table (column)</u>	<u>Tables 1 and 2 (row)</u>
Total domestic nonfinancial	1	1
U.S. government	2	2
Private domestic nonfinancial	3	5
Households	4	21
Nonfinancial business	5	22
State & local governments	6	20

Debt of domestic residents includes credit market funds raised from both domestic and foreign sources, while foreign debt represents amounts owed by foreign financial and nonfinancial entities to U.S. sources only. Financial sectors consist of U.S. Government sponsored credit agencies, federally-related mortgage pools, and private financial institutions. Credit market debt excludes trade debt, loans for the purpose of carrying securities, and funds raised from equity sources. It consists of debt securities, mortgages, bank loans, commercial paper, consumer credit, government loans, and other loan forms included in Table 1.

Full statements for sectors and transaction types in flows and in amounts outstanding may be obtained from Flow of Funds Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.
