## FLOW OF FUNDS SUMMARY STATISTICS

Growth of debt of domestic nonfinancial sectors strengthened to a 6-1/4 percent rate in the first quarter of 1996. The pickup was accounted for by a snapback in federal government borrowing, which had been held down by the debt ceiling impasse. Debt of nonfederal sectors grew at a 5-1/2 percent pace in the first quarter, near the rate of the fourth quarter. Household debt rose at a 7-3/4 percent rate, with increases in both home mortgage and consumer credit borrowing. Nonfinancial business debt growth slowed to a 4-1/2 percent rate in the first quarter, owing in part to a reduction in borrowing in the bond markets. Debt of state and local governments was about unchanged in the first quarter, as new issuance of tax exempt securities about matched retirements of previously refunded debt.

The level of nonfinancial debt outstanding at the end of the first quarter of 1996 was \$14.1 trillion. Debt of the nonfederal sectors was \$10.4 trillion, and federal debt was \$3.7 trillion.

### Explanatory Notes

Domestic debt includes credit market funds borrowed by U.S. entities from both domestic and foreign sources, while foreign debt represents amounts borrowed by foreign financial and nonfinancial entities in U.S. markets only. Financial sectors consist of government-sponsored enterprises, federally related mortgage pools, and private financial institutions. Credit market debt consists of debt securities, mortgages, bank loans, commercial paper, consumer credit, U.S. government loans, and other loans, as shown in table L.2; it excludes trade debt, loans for the purpose of carrying securities, and funds raised from equity sources.

Growth rates in the summaries above are calculated by dividing seasonally adjusted flows from table F.2 by seasonally adjusted levels at the end of the previous period. Seasonally adjusted quarterly levels in flow of funds statistics are derived by carrying forward year-end levels by seasonally adjusted flows. Growth rates calculated from changes in unadjusted levels printed in table L.2 can differ from those shown above.

The flow of funds accounts are available on 3-1/2" diskettes. The diskettes contain quarterly data beginning in 1952 organized in files that correspond to the tables published in the Z.1 release. In addition, the diskettes contain files with the monthly debt aggregate data published in the Board's H.6 release; data from the *Balance Sheets for the U.S. Economy* (C.9 release) are not available at this time owing to a delay in receiving source material compiled at the Department of Commerce.

Subscriptions to this summary release, the full statements for sectors and transaction types for flows and amounts outstanding (the Z.1 release), and diskettes may be obtained through **Publications Services, Stop 127, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, (202) 452-3244**. This release is also available on the **Economic Bulletin Board** of the Department of Commerce. A 670-page **Guide to the Flow of Funds Accounts** is available from Publications Services for \$8.50. The **Guide** explains the principles underlying the accounts and describes how they are constructed.
